#	Topic	Issue	Answer
1	Product notifications	How should the notification be displayed? who to notify?	The system should have a frame at the main menu, that displays all the products which met the pre-set minimum amount.
2	Inventory reports	What is an inventory report? what are the details that should be displayed there?	Inventory report should display for each product: Its name its catalog number amount on shelves amount on stock
3	Products category	Does a subcategory relates to a main category? can it have another subcategory itself? for example: Dairy->Dairy products->products && Size->250 ml-> products. or Dairy->Dairy products->size 250 ml -> products	The first option is required. Each product will have a single category , sub category and sub-sub category. categories must match the product and not contradict each other.
4	Faulty Products	What should be displayed at the faulty products report?	For each faulty report- will be display its item,catalog number,date on report and description - that describe the fault.
